Izveštaj za period od februara 2014 do aprila 2015,

**Striving towards excellence in Veterinary Education (EDUVET)
544270-TEMPUS-1-2013-1-RS-TEMPUS-JPCR, WP 3 EDUCONS – Organic
Livestock Production**

Projektni tim sa Educonsa imao je osnovni zadatak da napravi novi kurikulum za organsku proizvodnju u stočarstvu ("Organic Livestock Production"). Ovaj zadatak je podeljen u nekoliko etapa. Tokom 2014 godine tim se sastajao u određenim vremenskim periodima (prema potrebama programa) sa ciljem da se napravi novi kurikulum. Sadašnji program osnovnih studija imao je samo 3 predmeta koji su se odnosili na stočarstvo.

Cilj WP3 je priprema, sastavljanje i akreditacija posebnog programa organskog stočarstva u okviru osnovnih studija programa fakulteta ekološke poljoprivrede, a sastojao se iz više zasebnih zadataka:

- Proučavanje već postojećih programa na našim i stranim fakultetima, bilo u pogledu vrste predmeta ali i organizacije smestara i njihovog rasporeda. (završeno)
- **Zajedničke studije:** *prve dve godine* studenti slušaju iste predmete ali odvojeno za predmete biologija i fiziologija, u trećoj(3) i četvrtoj(4) godini studenti slušaju posebno predmete za biljnu i stočarsku proizvodnju. Uvedeni su **zajednički predmeti** u trećoj(3) i četvrtoj(4) godini: Proizvodnja biljaka za ratarstvo i stočarstvo; Marketing i Menadžment u organskoj proizvodnji ; Biofarma itd.) (ovaj model je predstavljen na sastanku u Budimpešti, nov. 2014)
- Obavljeni su mnogobrojni razgovori sa eminentnim profesorima o sastavu programa akreditacije
- Za realizaciju ovog programa potrebni su *novi profesori* pa su obavljeni razgovori u tom smislu sa potencijalnim kandidatima.
- U toku pravljenja programa stočarstav konsultovani su i sadašnji studenti sa fakulteta ekološke poljoprivrede putem ankete

- Posebna grupa angažovana na projektu razradila je model kompletne akreditacije fakulteta ekološke poljoprivrede prema standardima naše zemlje (prema projektu EDUVET ovaj program mora biti akreditovan, što je inače obaveza Univerziteta). Oba programa će biti akreditovana na Univerzitetu Edukons u Sremskoj Kamenici.
- Ekipa sa Edukosa koja je uključena u proces akreditacije programa stočarstva *radi na modelu uključivanja sadašnjih studenata u 3 godinu studija na smeru stočarstvo.*
- Donete su odgovarajuće odluke Nastavno naučnog veća fakulteta o angažovanju pojedinih nastavnika i asistenata za ispomoć u rešavanju pravnih i organizacionih aspekata akreditacije ovog programa. (odluke)
- Tokom sastavljanja *liste potrebne opreme konsultovani* su i drugi fakulteti iz ove oblasti. Sva naručena oprema je kompatibilna sa već postojećom opremom u laboratorijama Univerziteta Edukons (lista predata).
- Uspostavljen je saradnja (zvanično potpisivanje tokom aprila) sa Centrom za organsku proizvodnju (<http://www.organiccentar.rs/>) u Selenči (gde student mogu ici na kvalitetnu praksu iz obe oblasti). Ovaj ugovor je direktna posledica učešća našeg Univerziteta u projektu EDUVET.
- Dobijen je "spin of" projekat "Korišćenje biougla u organskoj proizvodnji" koji finansira Pokrajinski sekretarijat za nauku i tehnološki razvoj, Novi Sad, a koji se direktno odnosi na korišćenje biougla u proizvodnji biljaka za ljudsku i stočnu hranu.
- Uspostavljen je kontakt sa farmerima koji proizvode organsku hranu (biljnog i animalnog porekla) koji će biti uključeni u predavanja studentima na oba smera (Biofarma Milošević, Svilajnac; Atanacković Zoran, Crepaja).
- Krajem aprila počinje kampanja za upis novih studenata na ove osnovne studije gde će biti štampani flajeri (pored toga što su svi sadašnji student već obavesteni o novom programu) koji će biti razdeljeni potencijalnim studentima radi boljeg upisa u školsku 2015/2016 godinu.
- Pregovara se sa određenim nastavnicima koji su voljni da izdaju knjige relevantne za organsku proizvodnju radi sufinansiranja sa projekta EDUVET.

- Početak nastave 2015 se poklapa sa otvaranjem novog studentskog doma na Univerzitetu Edukons što će uticati i na broj upisanih studenta.
- Deo računarske opreme sa projekta EDUVET biće korišćen za WI-FI mrežu Edukonsa koja će pokrivati ceo Novi Sad, tako da bude dostupna 24h svim našim studentima.

WP 3 EDUCONS - Organic Livestock Production

The project team from EDUCONS his first task was to create a new curriculum for "Organic Livestock Production". This task is divided into several stages. During 2014, the team met at regular intervals (according to the needs of the program) in order to create a new curriculum. The current program of undergraduate studies had only three cases were related to animal husbandry. So, the objective of WP3 is preparing, assembling and accreditation of a special program of organic livestock production in the basic study program at Faculty of ecological agriculture and consisted of several separate tasks:

- The study of the existing similar University programs in our and the foreign country, either in terms of the types of cases or organizations and their distribution. (Completed)

- Joint studies: the first two years, students take the same courses, but separately for subjects of Biology and Physiology, in the third (3) and fourth (4) year students attend separate courses for crop and livestock production. They have a few joint subjects in the third (3) and fourth (4) year: as well as Production plants for agriculture and cattle raising; Marketing and management in organic production; Biopharma etc.) (This model was presented at a meeting in Budapest, November 2014)

- We were conducted numerous interviews with eminent professors on the composition of program accreditation

- For the implementation of this program will require new teachers so they interviewed in this regard with potential candidates.

- During the making this program (Organic Livestock Production) we were consulted current students from the Faculty of ecological agriculture through surveys.

- Special groups involved in the project has developed a complete model of accreditation of the Faculty of ecological agriculture according to the standards of our country (according to the project EDUVET this program must be accredited, which is the responsibility of the University). The programs will be accredited at the University Educons in Sremska Kamenica.

- The team from Educons, which is involved in the accreditation program of livestock production, work on how the current students will be involvement in the third years of study in new program.
- Rendered are appropriate decisions of Teaching and Research Council of the Faculty of engagement of individual teachers and teaching assistants to assist in resolving legal and organizational aspects of the accreditation of the program. (Decisions)
- During compiling a list of necessary equipment have also been consulted by other faculties in the field. All ordered equipment is compatible with existing equipment in the laboratories of the University Educons (list submitted).
- Established cooperation (officially signing in April) with the Center for Organic Production Selenca (<http://www.organiccentar.rs/>) (where students can go to good practice in both areas). This agreement is a direct result of our participation in the project EDUVET.
- We obtained a "spin of" project "Using biochar in organic production" funded by the Provincial Secretariat for Science and Technological Development, Novi Sad, which is directly related to usage of biochar in the plants for human and animal feed.
- Contact was established with the farmers who produce organic food (vegetable and animal origin) who will be involved in teaching students in basic academic studies (Biopharma Milosevic, Svilajnac; Atanacković Zoran, Crepaja).
- At the end of April begins a campaign to enroll new students in these basic studies and different flyers will be prepared and printed (in addition to all of the current student already informed about the new program). The flyers than will be distributed to prospective students in order to improve enrollment in the 2015/2016 academic year.
- Negotiating with certain teachers who are willing to publish books relevant for organic production to be co-financed by the project EDUVET.
- Students start in 2015 will coincides with the opening of a new student dormitory at the University Educons which will affect the number of enrolled students.
- Part of computer equipment to the project EDUVET will be used for WI-FI Educons network which will cover the area of Novi Sad, so that it is available 24 hours for all our students.

Ljubinko Jovanović, coordinator of WP3, Educons University, Sremska Kamenica
